Author Index for Volume 58 (2002)

Aalen, O.O. and N.L. Hjort, Frailty models that yield proportional hazards	(4)	335–342
Abundo, M., Some conditional crossing results of Brownian motion over a piecewise-linear boundary	(2)	131–145
Ahmed, S.E., R.G. Antonini and A. Volodin, On the rate of complete convergence for weighted sums of arrays of Banach space valued random elements with application to moving average processes	(2)	185–194
Antonini, R.G., *see* Ahmed, S.E.	(2)	185–194
Arellano-Valle, R.B., G. del Pino and E.S. Martín, Definition and probabilistic properties of skew-distributions	(2)	111–121
Bibi, A. and A.J. Oyet, A note on the properties of some time varying bilinear models	(4)	399–411
Biedermann, S., *see* Dette, H.	(4)	389–397
Braverman, M. and Y. Lumelskii, Chebyshev systems and estimation theory for discrete distributions	(2)	157–165
Bravo, F., Blockwise empirical Cressie–Read test statistics for α-mixing processes	(3)	319–325
Čekanavičius, V., On the convergence of Markov binomial to Poisson distribution	(1)	83– 91
Cerioli, A., Tests of homogeneity for spatial populations	(2)	123–130
Chen, J. and J. Glaz, Approximations for a conditional two-dimensional scan statistic	(3)	287–296
Cook, R.D. and X. Yin, Asymptotic distributions for testing dimensionality in q-based pHd	(3)	233–243
Csáki, E. and K. Gonchigdanzan, Almost sure limit theorems for the maximum of stationary Gaussian sequences	(2)	195–203
del Pino, G., *see* Arellano-Valle, R.B.	(2)	111–121
Dette, H., V.B. Melas and S. Biedermann, A functional-algebraic determination of D-optimal designs for trigonometric regression models on a partial circle	(4)	389–397
Dharmadhikari, A., S.B. Kulathinal and V. Mandrekar, An algorithm for the estimation of minimal cut and path sets from field failure data	(1)	1– 11
Gatto, R. and S.R. Jammalamadaka, A saddlepoint approximation for testing exponentiality against some increasing failure rate alternatives	(1)	71– 81
Gene Hwang, J.T., *see* Huwang, L.	(4)	355–362
Glaz, J., *see* Chen, J.	(3)	287–296
Gonchigdanzan, K., *see* Csáki, E.	(2)	195–203
Griffith, D.A., A spatial filtering specification for the auto-Poisson model	(3)	245–251
Hjort, N.L., *see* Aalen, O.O.	(4)	335–342
Hsu, C.-H., *see* Taylor, J.M.G.	(3)	221–232
Huwang, L. and J.T. Gene Hwang, Prediction and confidence intervals for nonlinear measurement error models without identifiability information	(4)	355–362
Iyer, S.K., *see* Nandi, S.	(3)	265–282
Jammalamadaka, S.R., *see* Gatto, R.	(1)	71– 81
Janssen, P., J. Swanepoel and N. Veraverbeke, The modified bootstrap error process for Kaplan–Meier quantiles	(1)	31– 39
Jones, M.C., On fractional uniform order statistics	(1)	93– 96
Karandikar, R.L. and M. Vidyasagar, Rates of uniform convergence of empirical means with mixing processes	(3)	297–307
Kleiber, C., Variability ordering of heavy-tailed distributions with applications to order statistics	(4)	381–388
Kozek, A.S. and M. Pawlak, Distribution-free consistency of kernel non-parametric M-estimators	(4)	343–353
Kulathinal, S.B., *see* Dharmadhikari, A.	(1)	1– 11
Kundu, D., *see* Nandi, S.	(3)	265–282
Lee, S. and Z. Su, Gaussian tail for empirical distributions of MST on random graphs	(4)	363–368
Li, H., Likelihood-based quadratic analyses for diallel cross and other experiments involving data collected on ordered pairs of sampling units	(1)	61– 69
Li, X. and L.H. Zhao, Bayesian nonparametric point estimation under a conjugate prior	(1)	23– 30
Lumelskii, Y., *see* Braverman, M.	(2)	157–165
Mandrekar, V., *see* Dharmadhikari, A.	(1)	1– 11
Marchand, É. and F. Perron, On the minimax estimator of a bounded normal mean	(4)	327–333
Martín, E.S., *see* Arellano-Valle, R.B.	(2)	111–121
